

The Single Kote Digital provides a simple and economic print finishing solution for the ever-changing lamination market. This system features a compact design that is capable of processing nearly any type of thermal laminating film. Unlike many other hand fed lamination systems, the Single Kote Digital features an automated cutter that is capable of separating even the thickest films.

Diagonal Cutter

Removable Turnaround Roller

Hand Feeding Sheet Tray

Digital Control Panel

- ☐ Laminates different sheet lengths without additional setup or stopping.
- ☐ Removable turnaround roller and swing out mandrel makes loading film quick and easy.
- ☐ Curl management system places film on the paper in a relaxed manner for a flat finished product.
- ☐ Centralized touch pad controls requires only one operator.
- ☐ Continuous operation diagonal cutter is capable of separating films of all types and thicknesses.
- ☐ Compact footprint conserves floor space in your workshop.

Hand Feeding

The Single Kote Digital features a sheet tray to hold prints that the operator feeds into the system. This unit is able to process different length sheets without any additional setup or stopping.

Laminator

The laminator section includes a swing out film mandrel and removable turnaround roller to make loading film quick and easy. Laminator settings are easily adjusted on the digital control panel for accurate processing.

Cutter

The diagonal cutter features a flying blade that separates sheets without stopping the film web. This cutter is capable of separating films of all types, offering you a wide variety of finished looks.
