

D&K's Pressure Sensitive Adhesives will meet any application requirement when mounting prints to a variety of substrates. These adhesives offer superior adhesion in several different formulations to meet your specific mounting requirements.

General Purpose Mounting Adhesive (MG)

A mounting adhesive equipped with a moisture stable liner as well as a rubber-based adhesive to insure the finished product is flat and offers a permanent bond. The ideal adhesive for mounting boards (gator, sintra, foam board), posters, wide-format digital prints and photographic prints to a wide variety of substrates.

Dual Mounting Adhesive Opaque White (Floor Graphics) (FI)

Offers a permanent adhesive on one side and a removable adhesive on the other. The opaque finish diminishes the effect of light important for trade show graphics. Perfect for images that are intended to be removed after a period of time, such as decals, signs and displays.

Dual Mounting Adhesive Clear (Floor Graphics) (FI)

Offers a permanent adhesive on one side and a removable adhesive on the other. Ideal for floor graphics and other images that are intended to be removed after a period of time, such as decals, signs and displays.

Ultra White Opaque Mounting Adhesive (MU)

Two-sided white adhesive designed for applications that require mounting to thin media. The opaque backing diminishes the effect of light as it shows through the finished piece leaving a smooth and polished print. Excellent for back lit applications and materials that are especially sensitive to heat.

Optically Clear UV Mounting Adhesive (OC/OCR)

Perfect for back lit applications when permanent mounting to Plexiglas® and other substrates such as glass and lenticular lens is desired. This double-sided mounting adhesive has UV inhibitors that reduce the effects of damaging rays. Permanent/permanent and permanent/removable adhesives are designed to easily remove from glass, Plexiglas® and acrylic sheet within six months of application.

Standard Mounting Adhesive (MES)

A general purpose adhesive which permanently bonds to a wide range of substrates. A cost-effective aggressive mounting adhesive with a polyester carrier and protected by a single moisture stable release liner. Also available in acrylic.

Optically Clear Mounting Adhesive (OC/OCR)
