

D&K ACCU II FS

AUTOMATIC LAMINATION CUTTER

D&K's Accumatic II, automatic lamination cutter, offers perfect precision cutting accuracy within thousandths of an inch. The microprocessor has a stepper motor drive which electronically "steps" the laminated web into position before cutting – this means more accurate cuts and a better finished product.

The stepper drive has fewer mechanical parts which means minimal maintenance. Furthermore, D&K's automatic lamination cutter only takes seconds to set up from job to job which will save you money on your labor costs.

Looking to "step up" the productivity in your laminating operation? Look to D&K's Accumatic II.
