

The EXP 55 Plus provides a versatile laminating and mounting solution for sign shops and other graphic finishing industries. A top heated roller allows for single sided thermal lamination or pressure sensitive (cold) lamination to self adhesive vinyls and related print media. Options including side slitters, foot pedal, and a media rewind offer additional automation to produce professional, finished products.

Nip &amp; Pull Roller Adjustment

Speed Control &amp; FWD/REV

Silicone Laminating Rollers

Rear Media Rewind

### Features

- ❑ Top roller heats up to 300°F
- ❑ Accepts rigid substrates up to 1/2" thick
- ❑ Spring-Loaded adjustable pressure on laminating and pull rollers for smooth, even lamination
- ❑ Foot switch allows hands-free operation for guiding materials during lamination (optional)
- ❑ Auto-grip shafts for easy loading of film
- ❑ Optional media rewind rolls up finished product for easy handling or additional processing

### Applications:

- ❑ Single sided thermal lamination
- ❑ Single sided pressure sensitive lamination
- ❑ Decals (floor graphics, window signs, etc.)
- ❑ Rigid substrate mounting
- ❑ Lamination of self-adhesive media

## Technical Specifications

Working Width:	54"
Laminator Width:	71.75"
Height::	50.5"
Depth:	31.5"
Depth (With Rewind)	42"
Net Weight:	Appx. 500 lbs.
Shipping Weight:	Appx. 600 lbs.
Maximum Temperature:	300 <sup>o</sup> F (top roller only)
Maximum Aperture:	1/2"
Maximum Speed	10 fpm
Maximum Film Diameter	8"
Electrical Requirements:	110/ 120 V, 1500 W

## Available Options

- >>Foot Switch
- >>Slitter Kit
- >>Finished Media Rewind
