

Lay-Flat Polyester (Mapped & Matched)

Polyester (PET)

Film

This represents Polyester film as it comes from the manufacturer -
[4] 40" Master Rolls

The curved red line represents the natural bow in the film as it is cast.

To compensate for this natural bow, the following rules must be followed:

- Rolls cut from the #1 master must be matched with rolls from master roll #4.

The bow in the film is then cancelled out.

- The same rule applies to roll #2 and #3. They must be used with each other.
- If the film from the manufacturer is slit into five rolls (1 - 2 - 3 - 4 - 5), the center roll (#3) bow is mostly flat and can be used with any center roll from any other manufacturer.

Example: Master roll #1 and #4 are slit into 10" rolls. The following rules must be followed -

Master roll #1 "A" roll must be laminated to master roll #4 "A" roll.

Master roll #1 "B" roll must be laminated to master roll #4 "B" roll, etc.

Made in the USA
